# 1100 TRAFFIC LANE, BONNET CLEANER & SOLVENT SPOTTER

## DIRECTIONS

## PRODUCT DATA

1. Always pretest for color fastness in an inconspicuous area before applying cleaning solution. Test with full strength product and allow to remain for at least three minutes. If color loss or fading occurs, do not proceed.

2. For best results use as a RTU and always spot clean as soon as possible. Spray the soiled area with a light mist, agitate with the blunt end of carpet brush and blot dry with a clean, white towel. If stain is not removed, repeat prior step. Always rinse thoroughly and blot dry between steps and as a final step.

3. For pre-spray and Bonnet cleaning applications: Dilute (8 oz. per gallon) 1:16 for light soils, (16 oz. per gallon) 1:8 for regular soils, and 1:4 (32 oz. per gallon) for heavy soils.

4. For bonnet cleaning, pre-treat high traffic lanes with Bonnet cleaning mixture. Apply diluted product to bonnet (via spray or immersion) and buff carpet. Replace bonnets as they become soiled. For faster dry times, re-buff area with a clean, dry bonnet.
