

This high foaming formula is designed to quickly penetrate and liquify baked on food, grease, and carbon deposits from most commercial and industrial ovens and grills. Non-flammable, biodegradable and completely phosphate free. Formula exhibits excellent vertical hold and is authorized for use by USDA in federally inspected meat and poultry plants. Use also as a fryer cleaner.

DIRECTIONS FOR USE
Commercial Ovens

Wearing rubber gloves and protective eye goggles, apply product (undiluted) to the bottom of the oven, then sides and top evenly. Allow product to stand 10 minutes in warm oven, or 25 minutes in cold oven before gently agitating soil with a synthetic pad or brush. Wipe surface, removing major soil and then thoroughly rinse all surfaces with potable water. Stubborn, thoroughly baked on food and carbon deposits may require additional application. Once oven is completely clean, thoroughly rinse and then heat oven to 220° for 10 minutes before cooking additional foods.

CAUTION: Do not apply to heating elements, electrical switches or connections.

Deep Cleaning Grills

Assemble tools such as scraper, scrub brush, grill block, cloth, rubber gloves and eye goggles. Turn grill off and while grill is still warm, scrape surface with scraper, scrub brush or grill block to remove excess grease, carbon and food deposits into grease trough and trap.

Spray product onto grill and let soak into soil for 3 minutes. Then lightly agitate surface with grill screen. Remove excess grease and food from grease trough and wipe clean with cloth. Thoroughly rinse grill plates and all surfaces completely with hot water and replace parts.

See manufacturer's recommendation for procedures in resizing grill with vegetable oil after cleaning.

SAFETY DATA DANGER: Corrosive. Contains sodium hydroxide CAS# 1310-73-2 and glycol ether CAS# 112-34-5. Causes burns to skin and eyes. Harmful if swallowed. **CAUTION:** Wear safety glasses and resistant gloves. Avoid skin contact. Use with adequate ventilation. Avoid breathing of vapors.

SPECIAL NOTE

Can be used in hot or cold ovens. Food deposits reduce heating efficiency, increase fire hazards, and cause unpleasant odors which adversely affect customers. Dirty grills or ovens also distort the foods' flavor and aroma.

HUSKY 470 OVEN & GRILL CLEANER Corrosive material. May cause burns. Avoid contact with eyes and skin. Wear suitable protective clothing. If in contact with eyes, immediately flush with water for 15 minutes. Contact physician if irritation persists. If in contact with skin, immediately flush with water for 15 minutes. Call a doctor if irritation develops. If ingested, do not induce vomiting. Contact physician immediately. **READ MATERIAL SAFETY DATA SHEET BEFORE USING PRODUCT.**
